

The Most Beautiful Ride on the Ocean

28'

CENTER CONSOLE

In the fishing and boating world, the name Buddy Davis is legendary. Known throughout the world for its Carolina flare and legendary ride, the Buddy Davis hull is designed to cut through monster head seas, run on rails in following breaking seas, and lie still while drifting in deep troughs. Proving that sheer beauty can be functional, the Davis' flare is not only a work of art, it delivers a dry ride.

The Buddy Davis 28' Center Console carries a deep vee forward and the entry at the bow is definitely sharper than most. The transom has a 24.5 degree deadrise and also sports a tumblehome hull side aft.

The new Buddy Davis 28' CC has eliminated the bracket and now features an integrated transom motor mount, thus eliminating the maintenance associated with a bracket and giving the boat a cleaner look.

Construction techniques are the latest in boat building technology using vacuum vinylester resin infusion. The boat is built like the big Buddy Davis yachts, making the boat stronger and lighter. The construction process utilizes Dyvinacell foam coring and stringers which eliminates any wood.

The deck and interior of the 28' CC is designed to be an excellent cruising or fishing platform for all sea conditions. Another key feature sure to be a hit with serious fishermen and novices alike, is the fact that the Buddy Davis 28 is packed with storage space including a gel coat lined forward under deck storage box with stainless steel hatch lifts. For added comfort and convenience the boat offers a stand up head area in the console.

The Buddy Davis 28' CC is a spectacular Center Console outboard. The 28' CC remains the best all around sea boat and unquestionably the very driest boat for rough water built anywhere in the world.
