The new **NOVURANIA LX** Series

A LUXURY VERSION TO THE HIGHLY SUCCESSFUL LAUNCH SERIES
 The refined design places emphasis on comfortable seating, easy boarding, side console and a walk-thru to the swim platform. Available in both diesel stern drive and outboard models from 6 meters to 7.5 meters. The new deck layout with bold new styling will compliment any yacht. While based on the proven offshore sea-keeping capabilities of the traditional Launch design, the refined design places the LX apart from her predecessors. Gone is the traditional and functional look of a ridged hard bottom inflatable, (RIB). The stylish wrap around aft seating with solid stainless steel supported backrest, modern console with instrument POD, and bow seating reflects the LX bold new look. Each boat is individually built for each client and is customized and outfitted reflecting the buyer's desires. As a versatile yacht tender, the LX can fit the many roles required. Transporting large guest parties and providing for all types of water sports activities is all in a day's work for the LX. With easy access to the molded in swim platform, getting in and out of the water is provided by the installed swim ladder. A fresh water shower system is conveniently placed near the ladder. Custom hull and deck colors along with the inflatable NOVURANIA collar can reflect the yacht's color scheme. Other amenities, like teak decking, full electronics package, and cushion fabric, are all available on the new LX.
